Dear Carpet CPR,

We have pet stains, teenager stains and other unidentified stains on our carpet. We spent so much money on stain remover "miracles" I could have cried and bought a home carpet machine. Well too many dollars and a sore back later, the stains just held their ground. Nothing worked.

My husband and I were at Sam's Club in northwest Houston one day and saw a display for Carper CPR, watched the video and said "what if really works"? I only believe in miracles of the spiritual kind, so I hesitate to use that word, but it's a miracle cleaner.

Some of the stains were so bad that we had decided nothing could help. Well, CPR worked so well, so much so, that we went back for more, there was none, called your 800 #, found where it was at another Sam's, went and bought 12 bottles. We made the mistake of showing it and giving bottles of it to family. We had not tried it on the stain that was the worst, thinking "no way". Well, we almost emptied our last bottle on it and it's coming out!

Went to Sam's OH NO THEY WERE OUT. Called your 800 # this morning and found out I can ask for it at the Bed, Bath and Beyond. I am going there tomorrow. If they don't have it I will ask them to order it for me and it's gonna get ugly if they won't! My hubby said to ask if you would sell it to us by the gallon, by the case?

I know you've heard it all but, this stuff really, really works! My female dog is 11 years old and has bladder problems. Had an accident Sunday am, I soaked up all I could, emptied the last drop out of the bottle, let it dry and all I can see now is the clean carpet spot, visible because it's cleaner now than the surrounding carpet.

Thank you,
Lonna

P.S. Market this stuff like crazy because I'm not giving it away anymore!
