

Leather Care Made Easy!!!

This is a leather cleaner and conditioner that is basically a one-step product made for cleaning horse tack and such. I would certainly use it on other smooth leather products, too, though. It's a very simple cleaner-it comes in several sizes, the one that I am saying  is the 32 oz size, so this is the big one that will last you a long time. It's a cream formula. You put a small amount on a cloth and wipe it into the leather item. As you wipe, the grime on the leather comes off and the leather itself is left soft, shiny, and conditioned. Leather products (such as saddles and bridles, but also jackets and shoes) last a LOT longer and stay looking newer. The conditioner tends to keep your leather clean for a longer time, too.

When using saddles in particular, you want to take good care of them-they cost a lot of money and you want to keep your investment looking good as long as possible. I use this product before every show I go to, so it ends up being several time a year. The leather stays supple and doesn't crack like a lot of other people's tends to do. The color in the leather even seems to last longer!

A little of this product goes a long way, and it goes on smooth and all wipes off so your leather isn't wet or slick at all for any amount of time. I certainly recommend this product to anyone who has leather products-especially those who get a lot of use out of those products. This will not stain or discolor your product and it will keep it looking like new for the longest possible time.
