Leather CPR Cleaner and Conditioner Tack Room

Manufacturer: Leather CPR
Model: Cleaner and Conditioner
Category: Tack Room

Purchase: I bought the 8 oz. container at a local tack shop for around \$14.00. The lady who works there told me its the best stuff you can buy, so I decided to give it a try.

Likes: IT WORKS!! bought my saddle from somebody off the internet about 4 months ago, and I have tried everything that you could possibly buy to clean a old, dirty and dry saddle. You can clearly see the difference after you rub it in! There's a nice shine, and the leather doesn't look old, dirty and dry anymore!When you rub it with a soft cloth, it produces an awesome shine I have NEVER seen in my life with regular Glycerin Soap and other products! I also like it because its not greasy like other products and they throw in a sponge!Even though it takes 60 seconds before you can rub it in, its still worth the time.

Dislikes: If you do not read the directions right, you will not get the results you are looking for. I had to clean my saddle twice because I didn't read the directions right! Also, you might want to find Leather CPRs' Saddle-Stick-em because the saddle will be slippery! The price is a little high too.

Quality: The container it comes in is very sturdy, and so is the sponge.

Summary: I would highly recommend this product to anyone who wants to "Bring leather back to life!" It truly works on any leather product!
