Subject: Leather CPR & King Ranch Truck Leather!!

Leather CPR Co.,

I have a 2002 FORD King Ranch truck that has real leather seats from the King Ranch in South Texas and am writing to let you know that the Leather CPR product works absolutely fantastic on this leather. Living in AZ., the interior get dusty and the seats get dirty from use as well as dried out from the extreme heat of summer. The CPR has returned these once dried out, dirty seats to almost brand new condition and the interior actually smells like it did when new, that great real leather smell. It's a good thing you sell the CPR in larger sizes for these big jobs!!

Thanks, Rob T.
