Subject: Leather CPR

I wanted to write you to give my praise of Leather CPR! We have a beach house with a large leather sofa, and two large leather recliners. The leather is a light tan (I guess neutral color), Even though our windows are reflective from the hot beach sun, our furniture still gets dry and crackly from the sun. We have had the house for eight years, and for all of this time I did not know what to use on the leather sofa and recliners. One day my daughter in law brought me a jar of Leather CPR, I tried it, and BOOM, I HAD THE LEATHER PROBLEM SOLVED!

I have now done the sofa and two chairs using four jars of Leather CPR, and I want you to use me as a reference for this great product!

Please let me know what stores sell your other products in the Charlotte, N.C. area, because if they are as good as Leather CPR, I want to use them also!

Sincerely,

Curt L. R
