Subject: wish to give a testimonial

Hello,

My name is Cherie !

I just moved and have 4 cats. One of them is 19 and I would hate to tell you what he does to my furniture. With all the claw marks on my leather chair and sofa I decided to clean with CPR today. I just finished. The furniture looks great. While the claw and nail marks are still there, they tend to look more like part of the leather than damage to the leather.

I urge anyone who has leather furniture to use this product to make their furniture look new again. I am going to give some to my brother-in-law who is obsessed with his leather in his cars. This stuff is great.

Thanks Leather CPR!

Cherie
