RE: LEATHER CPR

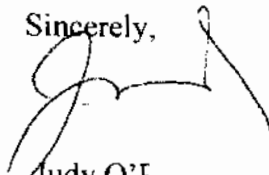

A big thank you from Georgia!!

I have two large, classic leather sofas that sit in our great room. In that room there is a 25 foot (mostly) glass wall that has a southern exposure. The sofas have taken a beating from the sun, not to mention the daily use. I had been unable to find a good product to use on the leather to clean and condition, until I found LEATHER CPR. Truly, with unbelievable ease, my sofas are revitalized.

Actually, my husband has complained because the leather is now so soft and smooth, our throw keeps falling to the floor. Imagine that! I can live with that kind of problem, because your product will ensure many, many years of beautiful leather. Has anyone tried it on skin???

Thank you.

Sincerely,

Judy O'F
